

ARPAN HAIT

Full Stack Developer | MERN Stack Specialist

Hooghly, West Bengal, India | +91 8509020280 | arpanhait2006@gmail.com

[LinkedIn](#) | [GitHub](#) | [Codolio](#)

Professional Summary

Results-driven **Full Stack Developer** with hands-on experience building responsive **React** applications and scalable backend systems using **Node.js**, **Express.js**, and **MongoDB**. Experienced in designing secure RESTful APIs, implementing authentication, and developing production-ready web applications. Passionate about writing clean, maintainable code, optimizing application performance, and using modern development tools including Git, Vercel, and AWS.

Technical Skills

Frontend & Core Web: React.js • JavaScript (ES6+) • TypeScript • HTML5 • CSS3 • Tailwind CSS • Bootstrap • Redux Toolkit

API & Integrations: RESTful APIs • Fetch API • Axios • JWT • OAuth • State Management

Development Tools: Git • GitHub • Firebase • Netlify • Vercel • Postman • AWS

Backend Knowledge: Node.js • Express.js • Python • Django • FastAPI • MongoDB

Core CS: Data Structures & Algorithms • Object-Oriented Programming • DBMS • Operating Systems • Computer Networks

Projects

To-Do Task Manager [Repository](#)

Tech Stack: Django, Python, HTML, CSS, JavaScript

- Developed a Django-based To-Do Task Manager featuring **2 relational** models, **9 custom schema** fields, and **8 CRUD** views following MVT architecture with secure user authentication.
- Improved task tracking efficiency by **25%** by eliminating layout shifts and optimizing application performance during complex database operations.

Deepfake Detection Framework [Repository](#)

Tech Stack: React, FastAPI, Python, MTCNN, EfficientNet-B0

- Built a responsive React frontend integrated with a Python FastAPI backend running **MTCNN** and **EfficientNet-B0** across **5** asynchronous REST API endpoints for real-time inference.
- Sped up validation workflows by **30%** by designing an async React media upload pipeline that processes multi-format inference metrics without UI blocking.

Industrial AI Anomaly Detection System [Repository](#)

Tech Stack: Next.js, React, TypeScript, FastAPI, Scikit-Learn

- Developed a real-time industrial anomaly detection platform using Next.js and FastAPI, integrating **Isolation Forest** and **Random Forest** models to analyze multivariate sensor telemetry for predictive maintenance.
- Reduced system monitoring time by **40%** for operators by replacing static logs with an interactive Next.js dashboard and live **WebSocket** telemetry streaming.

AI Autocorrect Tool [Repository](#)

Tech Stack: JavaScript, Netlify Functions, API

- Engineered a serverless frontend utility invoking Netlify Functions to run real-time language correction models.
- Cut sentence translation lag down to under **100ms** by migrating to a serverless Netlify architecture running strict structured JSON output rules.

Professional Experience

Generative AI Image Annotator

Jan 2026 – Apr 2026

RT Network Solutions Pvt. Ltd.

WB, Kolkata

- Annotated **185+** high-resolution images weekly for Generative AI model training while following strict annotation guidelines.
- Audited over **2,075** visual datasets, contributing to a **97%** project accuracy rate.
- Improved annotation efficiency by approximately **15%** through optimized contextual tagging and quality assurance practices.

Education

Narula Institute of Technology

2024 – 2028

Maulana Abul Kalam Azad University of Technology (MAKAUT)

WB, Kolkata-700109

Bachelor of Technology (B.Tech) in Computer Science & Engineering (AI/ML)

CGPA: **8.8/10**

Certifications

- Google** – Build a Website on Google Cloud [LINK](#) | **NPTEL** – Principles of Management (Elite) [LINK](#)
